

Dear Peter,

I wish you to be healthy for many more years. I hope that your 95th birthday will be one of the happiest days for you, as well as for many friends and colleagues who attended the reunion party in Göttingen.

I remember the fruitful collaboration with you which started about 30 years ago and yielded many nice publications about superfluid He droplets and fascinating microscopic superfluidity of hydrogen shells assembled inside cold He droplets.

Boris Sartakov

A handwritten signature in blue ink, appearing to read "Sartakov".
